

Arsenii Andriushchenko

Infrastructure Software Engineer | Ann Arbor, MI | Remote | arseniyandru@gmail.com | [in LinkedIn](#)

A full stack SWE with 7+ years of experience. Including building backend apps, cloud platforms and development tools. Knowledgeable in AWS ecosystem, Cloudformation, Terraform and experienced in domain of airlines. Fluent in Java, Python, k8s orchestration and a wide flavor of backend and frontend technologies. Always flexible and open to learn other skills.

Skills

AWS, Cloudformation Kubernetes, Helm, Gitlab CI, Terraform, Java, Spring Boot, DevOps, Grafana, Gradle, Jenkins, ELK stack, Python, Docker, Ruby.

Work Experience

Southwest Airlines, Remote, Dallas, TX | Senior Platform Engineer | April 2021 - Present

Developing GitOps deployment platform for scheduling of crew.

- Architected domain-driven infrastructure-as-code Terraform solutions for crew scheduling, ensuring modular, scalable, and reusable components.
- Developed reusable infrastructure modules to efficiently manage development and production environments using AWS, CloudFormation, and Terraform.
- Designed and implemented a GitLab failover pipeline (Python) framework for multi-region disaster recovery.
- Automated code migration from Bitbucket to GitLab, streamlining repository management and workflows.
- Integrated "Policy as Code" frameworks with Kubernetes and Helm to enforce compliance across infrastructure modules.

Collinear Group, Seattle, WA | Full Stack Software Engineer | Aug 2020 - April 2021

- Led full stack app team working on airplane data monitoring solution.
- Upgraded a legacy AngularJS/Electron application to Angular 11, enhancing performance and maintainability with webpack integration.
- Designed and implemented a comprehensive testing strategy for Electron apps, including end-to-end and unit testing with Spectron, cucumber.js, and GitLabCI.

Insight Inc, Plano, TX | Developer, Senior Developer | Jun 2017 - Aug 2020

- Influenced the development of the backend for insight.com's e-commerce platform by providing innovative solutions and architectural input.
- Developed a shipment tracking service that integrated APIs from FedEx, USPS, UPS, CEVA, and Purolator, offering seamless tracking capabilities for customers and internal teams.
- Enhanced system observability by implementing structured logging across microservices and legacy apps using the ELK Stack.
- Created a web-based tool using Docker Compose, Gradle, and Kotlin to simplify local development for the frontend team, boosting productivity.
- Developed a multi-module CI pipeline for microservices, leveraging Jenkins and Maven for incremental builds to optimize build times.

Mindtree, Gainesville, FL | Software Engineer, Senior Software Engineer | Feb 2015 - Jun 2017

- Delivered high-impact software solutions tailored for the airline industry.

Projects

- **NoteDoc**: An AsciiDoc editor with live preview and Google Drive integration. Technologies: VueJS, Vuex, Google Drive APIs [Live Demo](#)
- **Terraform Consolify** : debugging Terraform in AWS made easier with console links for each resource. [Terraform Registry](#)
